Introduction

The Unemployment Insurance Fact Book provides statistical data and other information on the Hawai'i Unemployment Insurance program.

The unemployment insurance program is an income maintenance program that provides a partial replacement of wage loss during temporary periods of unemployment. The program pays weekly benefits, generally up to 26 weeks, to individuals who meet the requirements of the state unemployment insurance law.

During 2019, there were three regular programs actively administered by the Hawai'i State Unemployment Insurance Division. The State Unemployment Insurance (UI) program covers private industry, state and county governments and nonprofit organizations. The federal Unemployment Compensation for Federal Employees (UCFE) program covers federal civilian employees. The federal Unemployment Compensation for Ex-Service members (UCX) program covers ex-service personnel. The Federal-State Extended Benefits (EB) program covers claimants who exhaust their regular benefits during periods of high unemployment.

This fact book contains regular program data from 2010 through the end of 2019. It does not include EUC08 data. Tables are presented by programs (UI, UCFE, and UCX) and also in a combined program total. Data for the current year is presented in the smallest available data group, either by county or local office. Unemployment statistics reports required by the Federal government are data sources for this fact book.

Since the start of the State Unemployment Insurance Program in 1937, various unemployment and training programs were implemented. A brief explanation and a history of these programs are provided in the appendices.

Publications from 1990 are available on the Internet at <http://labor.hawaii.gov/rs/>

Section I – Insured Unemployment

Insured Unemployment Rate

The insured unemployment rate (IUR) is one of many indicators of economic performance in the state. It is a standard measurement of unemployed individuals covered by unemployment insurance and represents a ratio of unemployed individuals to employed individuals.

The IUR is primarily used to trigger “ON” and “OFF” the permanent Extended Benefits Program (EB) and temporary programs approved during periods of high unemployment. The maximum number of weeks a claimant could draw benefits under the former temporary programs fluctuated and was dependent on the IUR.

The IUR and the percentage of the average IUR's for the corresponding period in each of the preceding two years are used to determine the triggering provisions of the federal-state extended benefits program. The IUR is calculated on a weekly basis by dividing insured unemployment by covered employment. Insured unemployment is the average number of weeks claimed for a 13-week period. Covered employment is the average monthly employment during the first four of the last six completed calendar quarters. Agent interstate claims filed in Hawai'i are also included in the weeks claimed.

Section III - Claims Data

Initial Claims

Initial claims are notices of unemployment filed: (1) to request a determination of entitlement to and eligibility for compensation (i.e., new claim, the first claim in a new benefit year; or transitional claims, a new claim filed the week following an expired claim); or (2) to begin a second or subsequent period of unemployment within a benefit year or period of eligibility (i.e., additional claim). Initial claims consist of new, transitional (Tran), additional (Add), agent state and liable state claims. An agent state is the state in which a claimant files an interstate claim for compensation against another (Liable) state where wages were earned. Agent state claims are filed in Hawai'i against another state and liable state claims are filed against Hawai'i by workers who have moved to another state.

Agent claim figures have sharply declined because most agent claimants now file their own claims directly with their home state, whereas Hawai'i previously filed the claim for them.

Data used in creating the chart is the total of all initial claims filed (new, transitional, additional, agent state and liable state). Initial claims include regular unemployment (UI), Unemployment Compensation for Federal Employees (UCFE), and Unemployment Compensation for Ex-Service members (UCX).

Average Weekly Benefit Amount and Average Duration

The average weekly benefit amount (AWBA) is computed by dividing total benefit payments by total weeks compensated in a year. The average benefit duration is computed by dividing weeks compensated by first payments. The number of weeks is the unit for average benefit duration. The minimum (Min) weekly benefit amount is the lowest weekly benefit amount for a week of total unemployment (\$5). The Maximum Weekly benefit amount is the highest weekly benefit amount, computed at 66-2/3% of the statewide average weekly wages.

Monetary Determinations

Monetary determinations are notices that inform claimants of their eligibility for compensation. The table provides eligible (Elig), ineligible (Inelig), total determinations eligible as a percentage of total (Elig/Total), determinations where the claimants are entitled to the maximum weekly benefit amount, and claimants entitled to the maximum as a percentage of the eligible determinations (Max/Elig). Monetary Determinations data includes Alternative Base Period.

Nonmonetary Determinations

Nonmonetary determinations are decisions made when possible disqualifying (Disq) issues (voluntary quit, misconduct, work refusal, etc.) to a claim arise. A claimant can have more than one determination when there is more than one existing issue or when a redetermination has been made on his or her claim.

Overpayments

Overpayments are benefit payments made in excess of what the claimants are entitled to receive. Fraud is willful misrepresentation in order to receive benefits to which not entitled. Non-fraud is an overpayment not due to willful misrepresentation (employer, claimant or state error, reversals, etc.).

The table shows the number of cases, the total amount of money involved, the average amount of money per case, and the total amount of money recovered (Rec).

Section IV - Financing

Unemployment Compensation Trust Fund

The Hawai'i Employment Security Law, Chapter 383 of the Hawai'i Revised Statutes, establishes the Unemployment Compensation Trust Fund under the administration of the Hawai'i Department of Labor and Industrial Relations. Unemployment insurance contributions (taxes) collected from employers are deposited into this fund and unemployment insurance benefits are paid from the fund. Also credited to the fund is interest earned on the reserves. The fund balance is the total assets of the Unemployment Compensation Trust Fund available for the payment of benefits.

Fund Balance Notes:

2009: Includes \$30,526,725 in federal ARRA (American Recovery & Reinvestment Act) receipts.

2010: In December 2010, the fund balance was depleted and Hawai'i began to take out Title XII loans from the US Treasury.

Employers

Successors are employers who acquire the experience records of other employers. A new account is an employer newly liable under the law. Terminations are the number of employers who terminated coverage during the year.

Contributing employers are those covered by the contribution provisions of the law. These employers' tax rates are based on a measure of the employers' experience with unemployment, with an insurance element of some sharing of costs among employers. Reimbursable employers which include nonprofit organizations and state and county government finance 100% of the benefits paid to their former employees; there is no sharing of costs involved. The total number of covered employers is a sum of contributing and reimbursable employers.

Taxable Wages

Taxable wages and other factors determine the amount of unemployment insurance taxes employers pay.

Total wages are annual payrolls of employers covered by the unemployment insurance law. Taxable wages are the part of total wages employers pay taxes on. This amount is limited by the taxable wage base. The taxable wage base (Base) is the maximum amount of wages taxable per employee per year.

The Legislature enacted special laws during 2008 through 2011 to reduce the taxable wage base. The net effect was to lessen taxes and reduce the unemployment compensation fund.

Tax Rates

Tax rates are involved in computing employer unemployment insurance taxes. Tax rates vary by each employer and are influenced by the amount of unemployment experienced by the employer.

Adequate Reserve Fund

The adequate reserve fund is also considered in determining employer taxes. The adequate reserve fund is the amount needed to maintain trust fund solvency. Trust fund solvency ensures payment of benefits at the highest level of unemployment experienced in the last ten years.

High rate is the highest benefit cost rate over the last ten years. The benefit cost rate is computed monthly by dividing total benefits paid by total wages. Adequate reserve is computed by multiplying the highest benefit cost rate by total wages. From 1992 to 2007, it was 1.5 times this amount. Current reserve is the actual unemployment compensation fund balance as of November 30.

The ratio is a comparison of the current reserve to the adequate reserve. One of eight tax schedules, A through H, triggers on each year depending on this ratio. Schedule A contains the lowest tax rates and schedule H contains the highest rates. Special legislation set the schedule without regard to the ratio to D in 2010, and F in 2011 and 2012.

Experience Rating Index

Experience rating means that each employer is assigned an unemployment insurance contribution (tax) rate according to some measure of the level of unemployment experienced by former employees. The Experience Rating Index (ERI) is a ratio showing the proportion of total benefits that results in the funding of benefits through individual employer experiences. The portion of benefits not funded through experience rating must be paid for on a socialized basis by all employers.

Benefit data shown below are for contributing employers only. Dollar amounts are in millions of dollars. The ERI is equal to the benefits charged to active employer accounts (Active Charges) divided by Total Benefits. Also shown are the benefits that do not affect experience rating. These are benefits charged to terminated accounts (Term Charges) (TC) and benefits not charged to specific employers for various reasons (Non-charges) (NC). Benefits charged to terminated accounts cannot be recouped from these employers as they no longer pay any taxes. The cost of non-charged benefits are socialized among all employers as no single employer is held accountable for such benefits. Benefits are non-charged when the unemployed claimant voluntarily quits, is discharged for misconduct, is enrolled in approved training, or is qualified for benefits only as a result of combining Hawaii employment with employment performed in another state.

Labor Force Estimates

Labor force estimates are the most current estimates of total employment and unemployment for the State of Hawai'i. Information in the table is rounded to the nearest 50 except for percent unemployed. Civilian Labor Force (CLF) is the sum of the total employed and unemployed individuals. Unemployment (UNEMP) refers to persons not working but are able and available to work. The total unemployment rate (TUR) is calculated by dividing the number of unemployed individuals by the civilian labor force. Employment (EMPLT) refers to the number of persons working.

Labor force estimates are found on the Hawai'i Workforce Informer (HIWI) website, located at www.hiwi.org. This site offers economic and labor market information for the State of Hawai'i, including data on wages, unemployment, employment, jobs, careers and training.
